The illustration shows a rabbit character and a garden scene. The rabbit is holding a basket of flowers. There are several potted plants, including sunflowers and tulips. The rabbit is standing next to a large flower shape that is made of numbered segments (1-7) and dashed lines for tracing. The segments are color-coded: 1 (pink), 2 (purple), 3 (dark purple), 4 (blue), 5 (teal), 6 (green), and 7 (light green). The dashed lines connect the numbers in a specific sequence to form the outline of the flower. The top part of the flower has a horizontal line with a pink triangle at the end, and the bottom part has a vertical line with a green triangle at the end. The middle part has a curved line with a blue triangle at the end. The right part has a horizontal line with a green triangle at the end. The left part has a vertical line with a teal triangle at the end. The bottom part has a horizontal line with a green triangle at the end. The top part has a horizontal line with a pink triangle at the end. The middle part has a curved line with a blue triangle at the end. The right part has a horizontal line with a green triangle at the end. The left part has a vertical line with a teal triangle at the end. The bottom part has a horizontal line with a green triangle at the end.
